

The Proteomics Alliance Presents: New Tools and Techniques for Protein Research - European Seminar Series

Liverpool – 2nd June 2004

Programme

09.00	Registration & coffee		
09.30	Welcome		
09.45	New Advances in Sample Preparation for 2D Electrophoresis	Rafael Valdes-Camin	Sigma-Aldrich, St. Louis, USA
10.15	Stable Isotope Strategies for Understanding Proteome Dynamics	Prof Rob Beynon	University of Liverpool
10.45	Looking for the Animals in the Proteomic Jungle. <i>2D-LC and DiGE Approaches</i>	Dr Andy Pitt	University of Glasgow
11.15	Coffee		
11.30	Proteomics Data Analysis and Bioinformatics	Dr David N Perkins	Imperial College London
12.00	MALDI-TOF – The Technique of Choice in Proteomics	Roy Edward	Shimadzu Biotech, Duisburg
12.30	Lunch		
13.30	Proteomic in the Analysis of Receptor Signalling	Dr Soren Naaby-Hansen	Ludwig Institute London
14.00	Looking Beyond the Gel-based Paradigm in Proteomics	Chau Nguyen	Proteome Systems Australia
14.30	Tea		
14.45	Mechanisms of Drug Toxicity Exploited through Hepatoproteomics	Dr. Rosalind Jenkins	University of Liverpool
15.15	"The development of automated proteomic technologies and their application to breast cancer research"	Dr. Robert Mount	NextGen Sciences Alconbury
15.45	Open discussion		
17.00	Close		

Venue: Sherrington Building
University of Liverpool
Pharmacology Department
New Medical Building, Ashton Street
Liverpool, L69 3GE
